Cierra Washington

Software Engineer

I'm a creative, front end focused software engineer with a collaborative, team oriented approach to development. My experience consists of delivering delightful experiences to the end user, and this is what motivates me as an engineer.

Work History

2020-02 - Current

Software Engineer

Osano, Remote

- Develop React components using React Redux and React Hooks
- Analyze, design and develop tests and test-automation suites.
- Collaborate cross-functionally with data scientists, business users, project managers, and other engineers to efficiently deliver software solutions.
- Work alongside other engineers on a remote team to elevate technology and consistently apply best practices.

2019-07 - 2020-02

Software Engineer

Spalding Consulting Inc., Lexington Park, MD

- Using Xamarin/C#, worked on a mobile application used for locating buildings on the NAVAIR Station/base in Patuxent River, MD.
- Worked on robotic process automation projects, creating and modifying existing bots to make every day tasks easier for clients and save them significant time.

2018-11 - 2019-05

Software Engineer

Take Three Technologies, Denver, CO

- Enhanced users' experience of the LoanMaps CRM using a JavaScript (including Knockout JS) and Kendo UI front end.
- Developed Xamarin mobile app (for iOS and Android) for the LoanMaps CRM from the ground up,
